

# COMPANY PROFILE

## History

Established in 1990, Originally as Wigzell Tyres specialising in providing truly independent transport tyre solutions to both large and small operators. Being independent of any one brand affiliation has allowed the company to move with completely transparent solutions—choosing the best performing product based on cents per klm, versus a predetermination allegiance to any one brand.

Through the years of providing superior service the business has grown to include a production facility that constructs premium Retread products (RINGtread) and in addition, traditional technology retread product. This diversity has allowed us to sustain our objective of providing truly genuine solutions to our clientele. Through this process of controlled growth we have invested in capital equipment to meet our growing clientele needs.

Ensuring that we are able to facilitate and surpass our customers expectations. The diversity of our service include passenger, truck, light truck and earthmoving.

## Industry Experience

Ringtread SA are proud to have been fulfilling some of Australia's most successful companies with their transport tyre requirements for more than 27 years.

The likes of Gilberts Transport, Wightman Transport, Symons & Clark, S&S Logistics, McMahon Services, Toyota Dealerships, Dyers Transport, Dennis Transport, Eades Transport, EssKar Go Transport to name a few.
